Description: This is the Lenovo-branded boot disc (Rescue and Recovery Disc) for Product Recovery Disc packages. Use the following information to create the Rescue and Recovery Disc label.

File identification

RNR*xxxxx*.PDF: The Recovery Disc artwork template in Acrobat Portable Document Format. Use Adobe Acrobat Exchange version 4.0 or later to edit.

RNR*xxxxx*.CDR: The Rescue and Recovery Disc template artwork is in CorelDraw format. This file is provided as a backup in case you are unable to modify the RNRxxxxx.PDF file. Use CorelDraw 8 or later to edit.

VALUES.TXT: This file contains the values for the fields defined in the artwork template. This is the same information as printed in the Field and Value areas of the physical Golden Master Recovery Disc label.

Instructions for editing the artwork template

1. Locate the artwork template in the \MFG folder, and then use Adobe Acrobat Exchange version 4.0 or later to insert the following items into the appropriate fields in the artwork template. See the \MFG\VALUES.TXT file or the physical Golden Master Rescue and Recovery Disc label for the values to use in these fields.

   - **Field 2 (left side of the disc):** Enter the date: Month (spelled out) and 4-digit year only
   - **Field 3 (left side of the disc):** Enter the 7-digit part number in the format “P/N *XXXXXXX*”
   - **Field 7 (right side of the disc):** Enter the MS copyright date after the copyright symbol
   - **Note:** Ignore fields 0, 1, 4, 5, 6, and 8 in the VALUES.TXT file and the golden master label; they are not used in this template. The AR is authorized to modify Field 7 to meet the latest MS requirements.

2. **Important:** For discs being replicated in China, do NOT change the "Recorded in China" statement. If this disc is replicated outside of China, modify the "Recorded in China" statement to reflect the actual country or region where the disc is being replicated. The

country or region name must be printed in English and spelled out – no abbreviations can be used other than USA for the United States, and UK for the United Kingdom.

Instructions for replication

- Use silver disc media.
- One-color process (black on silver).

Assembly information

- Place the disc in a windowed, white-paper disc sleeve so printed side of disc shows through the window.
- Refer to the individual Product Recovery disc package EC for additional packaging instructions.
